

Smart Healthcare Chatbot - AI Virtual Receptionist for 24/7 Patient Screening and Triage

Description

Meet your always-on digital receptionist.

The Smart Healthcare Chatbot is an AI-powered assistant that screens patients 24/7, collects symptom information, and delivers instant triage insights using MediBud's advanced diagnostic algorithms. It helps reduce clinic workload, improve patient intake accuracy, and enhance customer experience.

Perfect for:

- Telehealth providers
- Remote medical practices
- VA agencies handling patient support
Compatible with WooCommerce, WordPress, and EMR systems via plugin or API integration.

Key Features:

- 24/7 intelligent patient triage chatbot
- Customizable conversation flows and symptom checks
- HIPAA-compliant, secure data collection
- Appointment booking & CRM integration

- Built-in AI diagnostics engine for risk analysis
